Policies for fuel poverty

- Focus on energy efficiency
- Cannot identify the fuel poor – hidden, chaotic
- Work with the community, be fully inclusive
- Area based, not pepper-potting
- Local Authorities responsible, with ECO funds
- Standards, not measures, as in Fuel Poverty Strategy
- No F & G by 2020; jump straight to C
- Electricity and gas: EPC effectively gas only
- Minimum standards for all
- Owner responsible for energy efficiency of property, not tenant
